

Hello, my name is Renee and I am a patient of Fedorko Chiropractic Health Center. I'd like to share my testimony with you.

At the early age of 27 I had my first heart attack and received a surgery called a "roto-blader" and it was extremely painful; it was to clean out my arteries. I was put on nitro-patches, blood pressure medicine and cholesterol beta-blockers. Switched cholesterol medicines quite a few times due to the "side effects" which were not pleasant to say the least. After awhile things became more intense with pain in my chest and so they increased my medicines and increased nitro-patches. For awhile I felt like a guinea pig while the doctors were trying me out on all these different medicines, they weren't too sure what to do with me for one because of my age, and the other is they say I have extremely small arteries and at that time they didn't want to go in and do open heart [surgery] because they said it would leave scar tissue that they knew they would have to go back in and do surgery on my heart in about 10 years.

Since that time, I have had two angioplasties, heart catheterizations done. I was okay for while. During all this, my dad had a heart attack and triple bypass surgery, my sister at the age of 37 had quad bypass surgery, then my mother died of cancer, and two years later at the age of 39 the same sister died of a massive heart attack. Another sister (honestly) at the age of 37 had a massive heart attack and had triple bypass done, plus was diagnosed with M.S. My eldest sister also has heart problems, and a brother with high blood pressure.

In November 2006, things got worse for me and I had to have immediate open heart triple bypass surgery done (at you guessed it, age 37). That was a nightmare, to say the least! After 3 months I went back to work, started feeling a little lousy, then in July of '07, just a little over six months after open heart surgery, they had to do some nuclear test on me, and found one of my "new" bypasses had closed! They offered increased medicine and nitro-patches. So, I decided to go to a well known hospital in Cleveland for a second opinion; they said there was really nothing they could do at this time and increased my nitro patch and gave me different cholesterol medicine. They said my artery (bypass) was too small and they had nothing small enough to go in there at this time. So, I tried to follow what they told me to do, and when I had pains they said to make sure I took my nitro tablets to help ease the pain and symptoms... yeah. Alright then.

2008 wasn't looking too good either, things would be okay here and there, still dealing with all the same stuff. In October of '08, I started really getting bad, I did think I was going to die! Then a couple at my church told me of Dr. Fedorko, and at first I was extremely hesitant, but then figured I'll give somebody one last shot, otherwise just shoot me and get it over with. Dr. Fedorko saw me and assessed me and then after a few appointments suggested the Standard Process Purification. I started the process in January and I was faithful for the 21 days and followed the suggestions and guidelines afterwards and I just celebrated my 40th birthday and I feel absolutely amazing!!!! I haven't felt this great since I was 25; I am free from chest pain, I'm not on any medications and even my restless leg syndrome is gone. I can sleep again, I have energy and I know more about how to eat healthy and eat the right foods for "my body," and even got rid of some unwanted weight at that! I am looking forward to learning more ways to take care of and to keep my body healthy.

I highly recommend Standard Process to anyone and everyone! Under the care of Dr. Fedorko and Standard Process my life has changed drastically! I look forward to doing the purification again once a year. Words cannot describe what it has done for me, in every aspect of life. I have one daughter left at home as a freshman, two adult children and three amazing granddaughters to enjoy for many years to come. It's a matter of choice of how we want to live and if we love ourselves enough to discipline

ourselves to do this and make it a way of life, not just a quick fix. Life looks so much more wonderful to me and worth living and I want to make the best of it and live life to the fullest!!

Sincerely,
Renee L. Gang
